banana skippers

The banana skipper caterpillar destroys the leaves of banana trees.

mango pulp weevil

This weevil larvae eats the inside of mangoes.

This is a photo of the weevil's face

brown rot

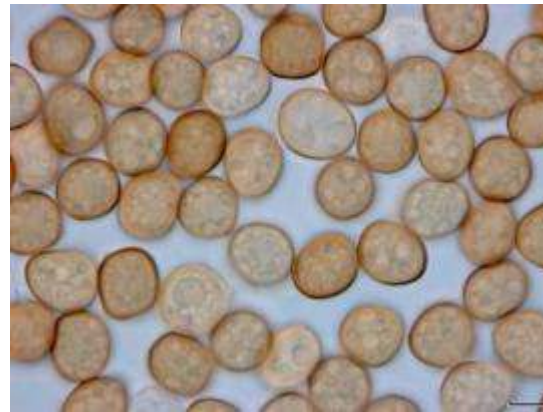

This disease is caused by a fungus.
Brown rot occurs in apples, cherries, pears, peaches and other fruits.

covered smut of wheat

This disease is caused by a fungus.

The plants might look healthy but the wheat grain has been changed into a fungus.

apple maggot

Apple maggots eat the inside of the fruit.

What's worse than finding a worm in your apple?

Finding half a worm!
